SHASHANK SETH

+91 9794785693 | shashankseth.tech@gmail.com | Varanasi, India

PROFILE

Motivated Bachelor of Computer Applications (BCA) student with robust core technical knowledge in Python, JavaScript, HTML5, CSS3, and browser APIs. Skilled in developing Chrome Extensions (Manifest v3 architecture), AI integration, interactive web interfaces, and automated desktop applications. Dedicated to leveraging cutting-edge web technologies and LLM capabilities to build high-utility digital products.

EDUCATION

JNM College for Advanced Studies and Technology *Graduation: July 2027 | Pursuing*
Affiliated to Mahatma Gandhi Kashi Vidyapith (MGKVP), Varanasi, India
Bachelor of Computer Applications (BCA) – 4th Semester: 73%

TECHNICAL SKILLS

Programming Languages:	Python (OOP, Standard Libraries, Functional Programming), JavaScript (ES6+, DOM Manipulation)
Web & Extension Dev:	Chrome Extension API (Manifest v3, Context Menus, Background Service Workers), HTML5, CSS3, Flexbox/Grid, Netlify Deployment
AI & LLM Integration:	Prompt Engineering, REST APIs, OpenAI/Gemini Integration, AI-based Content Summarization & Code Analysis
Desktop & Voice Automation:	Speech Recognition ('SpeechRecognition'), Text-to-Speech ('pyttsx3'), OS Module Automation Tools
Databases & Platforms:	Git, GitHub, VS Code, MySQL, Netlify CLI

CERTIFICATIONS

Basics of Python – UniAthena & Cambridge International Qualifications (CIQ), UK (Blockchain ID: 4691-8336-4747)
AI Literacy – IBM SkillsBuild (Credly Verification URL: https://www.credly.com/go/BtFT6llb)
AI Fundamentals: Foundations for Understanding AI – IBM SkillsBuild (Verification ID: Credly vJ9J8QQu)
Strategic Planning in the AI Age – HP LIFE Foundation (Certificate ID: 6ac6bb56-5412-452b-9087-3cd3b66205dd)

PROJECTS & APPLICATIONS

Smart AI Explainer & Summarizer – Chrome Browser Extension

Tech Stack: JavaScript, Chrome Extension API (Manifest v3), LLM API Integration, HTML/CSS

- Engineered a custom Manifest v3 Chrome extension to let users highlight code snippets or text on any site (GitHub, docs, blogs) and receive instant plain-English explanations via right-click context menu.
- Architected background service workers, content scripts, and LLM prompt engineering to handle contextual summarization for code, technical documents, and web articles.

JARVIS – AI Desktop Assistant & Voice Automation

Tech Stack: Python, SpeechRecognition, pyttsx3, OS Automation

- Developed a Python desktop voice assistant using speech recognition and offline TTS engines for hands-free system commands and interactive voice feedback.
- Automated OS tasks including launching desktop apps, executing web searches, running utilities, and optimizing daily workflow routines.

Interactive Web Applications & E-Commerce Frontends

Tech Stack: Vanilla JavaScript, HTML5, CSS3, Responsive Design, Netlify

- Built dynamic frontend applications and e-commerce UI components featuring interactive product displays, real-time DOM manipulation, and responsive logic.
- Configured continuous deployment pipelines using Netlify workflows for hosting live Web applications with optimized asset management.

DEVELOPMENT EXPERIENCE & CORE COMPETENCIES

- **Extension Architecture & Web Dev:** Hands-on experience with Manifest v3 extension architecture, background service workers, content scripts, dynamic DOM manipulation, and responsive web styling.
- **Python & Core Logic:** Solid understanding of Python OOP principles, standard data structures, functional utilities ('map', 'filter', 'reduce'), and script automation.
- **Workflow & Version Control:** Experienced in using VS Code, Git, and GitHub for repository management, version tracking, and deployment platforms like Netlify.
